## Abstract

A catalogue of the subfamily Cerambycinae (Coleoptera: Cerambycidae) of the Neotropical Region is presented. Fifty-seven tribes, 10 subtribes, 716 genera, 3789 species and 68 subspecies are listed in alphabetical order. Under each family-group name bibliographical references are given and under each species-group name, data on the type locality, the acronym of the institution where the type is deposited, the geographical distribution and detailed bibliographical references are provided. One new combination is presented: *Plocaederus yucatecus* (Chemsak & Noguera, 1997), new comb., from *Brasilianus*.

**Key words:** Catalogue, Cerambycidae, Cerambycinae, Coleoptera, Neotropical
